

**LANDMARK
FUEL SECURE**
MAKE EVERY DROP COUNT

Landmark FuelSecure Fuel Management Solutions

Prevent fuel theft from impacting your business.

Reduce the threat of fuel theft today!

The Landmark FuelSecure Fuel Management Systems allow business owners and fleet managers to easily monitor and manage fuel consumption for their fuel tanks, whether static tanks or mobile tanks. With actionable information provided by real-time data, managers can reduce costs, save time,

improve driving behaviour, streamline tax reporting, and reduce their carbon footprint. Take back control of your fleets' fuel expenditure with customisable fuel monitoring and management solutions!

Make every drop count.

Amazing Features of the Landmark FuelSecure Fuel Management Software

Real Time Streaming

View fuel-readings / levels on demand directly from the fuel tank when fuel is dispensed, added, being siphoned, or consumed per transaction.

Schedule Alerts

Easily schedule low level and high level alerts and receive notifications for targeted events.

Comprehensive Reporting

Receive comprehensive and detailed reports regarding your fleets' fuel usage per day, week, month, or year.

Detect and Prevent Fraud

With access to comprehensive fuel reports, schedule alerts, and real-time readings, you can easily identify and react to suspicious or fraudulent behaviour.

Live Monitoring

Know how much fuel your fleet is consuming in real-time and easily detect possible fuel theft.

Centralised Monitoring

Easily monitor fuel usage, engine performance, vehicle speed and idle times from one centralised dashboard.

Fuel Management Hardware Features

Providing you with superior fuel management solutions

One Size Fits All

The fuel probes can be shortened or extended (up to 6 meters) to fit virtually any tank.

Hassle Free Maintenance

No maintenance of the fuel probe required, you simply install the probe and start receiving reports.

Monitor Fuel in any Tank Type

Probes can be fitted to static fuel tanks, mobile fuel tanks, water-based vessels, locomotives, vehicles, staff transport etc.

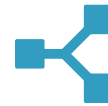

Versatile Weather Conditions

Fuel probes are designed and manufactured to withstand the hardy African weather conditions.

Cross-Device Monitoring

All the probe information can be viewed centrally from any device.

Large Variety of Probe Types

There are several different probes i.e. RS232, RS485, Analogue, CAN and GSM that can be utilised.

Amazing Features of the Landmark FuelSecure Anti-siphoning Device

Robust Material

Made from solid 080M40 steel. Machined on computer controlled machines and manufactured from aluminum & plastic round bar.

Quick and Easy Installation

Installation can take up to 15 minutes to complete. No drilling or glue involved when installing.

Tamper-Proof Design

It consists of a tamper-proof break off nut and lockable cap. There are no punctures or floats.

Flexible Tank Solutions

Our anti-siphoning devices are suitable for any tank size.

Permanent Fuel Tank Security

Once the device is installed it is almost impossible to remove.

Large Variety of Device Types

There are several different types of anti-siphoning devices to choose from for your fleet.
