

LANDMARK TRACKING

LMT AT4 ASSET TRACKER

A rugged, long-lasting and powerful mini portable asset tracker.

Track & Protect Your Assets with Ease

Our new-generation tamper-proof, fully portable asset tracking solution powered by Landmark's trusted and multi-function platform.

The Landmark Tracking LMT AT4 Asset Tracker is a robust, portable device packed with advanced tracking features, a durable design, and long-lasting battery life. It houses state-of-the-art GPS and LBS tracking technology, providing detailed reports on your asset's location.

Whether you're tracking electronic devices, generators, vehicles, containers, or maritime vessels, this tracker can show where your asset is headed and how fast it's travelling. Equipped with an internal microphone for audio monitoring of the surrounding environment, operators can quickly dispatch emergency services when needed.

The device also features a 10,000mAh battery and an IPX5 waterproof rating, ensuring it can withstand and operate reliably in the harsh South African environment.

It's Robust and Discrete

GPS & LBS Tracking

By combining multiple positioning systems (GPS and LBS), the device ensures that asset locations are accurately relayed to the tracking platform.

IPX5 Water Resistance

Thanks to its robust design and IPX5 waterproof rating, the device delivers reliable performance even in South Africa's harsh climate.

10,000mAh Rechargeable Battery

Equipped with a high-capacity rechargeable battery, the device is ideal for long standby applications, allowing for convenient recharging and redeployment.

Tamper Alerts

The device features a pressure-sensitive button that, when loosened or adjusted, triggers a tamper notification on the tracking platform.

Strong Magnetic Base

Requiring near-zero installation, the LMT AT4 fastens securely to most metal surfaces, enabling discreet placement across a variety of assets.

Remote Listen-In

With a built-in microphone, operators can remotely monitor audio from the surrounding environment. This allows for a rapid response in emergency situations such as hijackings or accidents, helping to ensure driver safety and asset security.

Seamless Software Integration

All device activity flows directly into your Landmark Tracking dashboard, enabling complete asset oversight:

Daily Route Maps

Easily view all driver trips and routes taken throughout the day for better visibility and planning.

Live Alert Notifications

Receive instant notifications for the events that matter most to you — from movement to unusual activity.

Custom Geo-Fencing

Set up Go-Zones and No-Go Zones to manage where your devices are allowed or restricted.

Driver Behaviour Monitoring

Get real-time alerts for speeding, harsh braking, and unnecessary idling to promote safer, more efficient driving.

Sleep & Wake Alerts

Stay informed when your device enters or exits sleep mode, helping you monitor asset activity more closely.

Real-Time GPS Tracking

Track your assets in real time via web or mobile platforms — anytime, anywhere.

Industries that can benefit from the LMT AT4 Asset Tracker

Government,
Local Authorities,
Municipalities and
Public Transport

Transport and
Logistics

Mining and Yellow
Equipment

Airlines (Aviation)

Agriculture

Other Industries

Don't wait until your assets are at risk. Be first. Be secure.
