

LMT240 MOBILE ASSET TRACKER

South Africa's first, new generation tamper proof, fully portable asset tracking solution.

The LMT240 Solution is Unique

South Africa's first, new-generation tamper-proof, fully portable asset tracking solution powered by Landmark's trusted and multi-function platform.

- ✓ **A first-of-its-kind solution in South Africa**
The LMT240 introduces an entirely unique mobile tracking solution to the local market.
- ✓ **Easily integrated reporting**
The Landmark Tracking state-of-the-art platform combined with the LMT240 hardware is a first for South Africa.
- ✓ **Technology that's ahead of its time**
While most GPS asset trackers in South Africa still rely on 2G networks, the LMT240 is built with 4G LTE Cat 1 – delivering modern, reliable connectivity.
- ✓ **Versatile setup to suite your needs**
Numerous setup and configuration choices with an automated recovery mode feature.

It's Just Better

- ✓ **Battery life up to 4 years:** Far longer than comparable trackers, you can also easily extend battery performance by pausing device usage when in storage.
- ✓ **Double tamper alerts:** Immediate notifications if the device is removed, moved, or interfered with.
- ✓ **Landmark software integration:** Proven cloud-based platform, real-time notifications, and cross-device integration.
- ✓ **GNSS and Bluetooth support:** Enhanced location accuracy and flexible connectivity.
- ✓ **4G network technology:** Built for the future, with 3G/2G fallback and optional dual SIM support for remote areas.
- ✓ **Accelerometer and wake-up function:** Activates tracking on movement for efficient energy use.
- ✓ **No installation:** Attaches instantly to metal surfaces via an industrial-strength built-in magnetic base or detach the magnetic base and use as a stand-alone tracker.
- ✓ **Compact and discreet:** At 60mm x 60mm x 25mm, it is easily hidden or mounted without detection.
- ✓ **Over-the-air (OTA) updates:** Seamless and remote firmware and command upgrades without removing the device.
- ✓ **Up to 50% more affordable:** Compared to similar feature-rich devices in the market.
- ✓ **Water and dust resistant (IP68):** Rugged protection against the elements for dependable outdoor use.
- ✓ **Various map sets:** The user can choose between various map sets, and geo-fencing.

Perfect for You

- ✓ **Logistics and supply chain managers** securing mobile freight or temporary cargo or tracking containers.
- ✓ **Rental, leasing, or construction businesses** tracking high-value movable equipment.
- ✓ **Agricultural operations** needing theft protection without hardwiring or vehicle, equipment, and produce.
- ✓ **Transport operators** seeking a secondary, hidden tracker for hijacking or tamper scenarios.
- ✓ **Mining operational managers** securing transport of minerals and equipment.
- ✓ **Any organisation** needing reliable, modern, asset visibility.

Seamless Software Integration

All device activity flows directly into your Landmark Tracking dashboard, enabling complete asset oversight:

- | | | |
|--|--|-----------------------------------|
| ✓ Live GPS location | ✓ Includes LBS function | ✓ Tamper and movement alerts |
| ✓ Battery status monitoring | ✓ Route playback and journey logs | ✓ Accurate Geofencing |
| ✓ Custom reporting and scheduling | ✓ Access via desktop and mobile | ✓ Numerous push and/or SMS alerts |
| ✓ Detailed reporting – including history, trip playback, violations and exceptions | ✓ Choice of various map sets, including several road, hybrid or satellite maps | |

Don't wait until your assets are at risk. Be first. Be secure.
